

WEBINAR

REMOTE VIDEO INSPECTION (RVI): A NEW QUALITY CONTROL TOOL

FRIDAY 24 APRIL 2020

H 10:00

Large-scale projects with complex international supply chains rely on vendors and suppliers all over the world. To ensure product and supplies are delivered on time and meet the required standards, companies need assurance that suppliers involved have the capability to fulfil the order and are working to the schedule and specifications. That kind of oversight demands global access to reliable, expert technical inspection services. This type of service can be done also using smart technology like Remote Video Inspections, using technology to provide travel savings, reduces downtime and maintains business continuity.

TOPICS:

- Digital Solutions for Business Continuity: how to approach the procedure
- Is Remote Video Inspection a real Quality Control? And why?
- Practical Scenarios and Case Studies

WHO SHOULD ATTEND?

This webinar is suited to anyone involved in manufacturing companies or EPC, project managers and product managers, project quality engineers and quality managers.

SPEAKERS:

- Andrea Tonus, Intertek Italia Industry Services Team leader – RVI Country expert
- Damir Ciappei, Intertek Italia Technical manager
